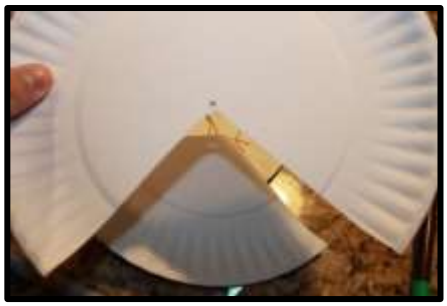
Step by Step Instructions to make a Seasonal Tree Spinner.

You will need:

- 2 paper plates
- Paint (range of colours if possible)
- A split pin
- A ruler
- Brown marker
- Ruler
- Scissors

1. Take one paper plate and use a ruler to divide it into quarters.



2. Use the scissors to cut one of the quarters away.

3. Paint both the cut plate and the whole plate blue.

4. Once the plates are dry, take the whole plate and use a ruler to mark out quarters.

5. Use a brown marker to draw tree branches working from the centre of the plate outwards.

6. This part is quite tricky – make sure you're concentrating. Think about what a tree looks like in each season. Decorate each quarter to represent a tree in each of the four seasons.

7. Take the cut plate and draw a tree trunk leading up to the cut away quarter.

8. Place the cut plate on top of the decorated whole plate and attach them, by putting a split pin through the centre of both plates.

9. Enjoy watching the tree travel through the seasons on your spinner!
