Paper Plate Chicken

Resources:
- Paper plate (or card paper)
- Yellow and orange paint
- Paint brush
- White and orange paper
- Scissors
- Googly eyes (or a marker to draw)

1. Paint the paper plate yellow. Let it dry.

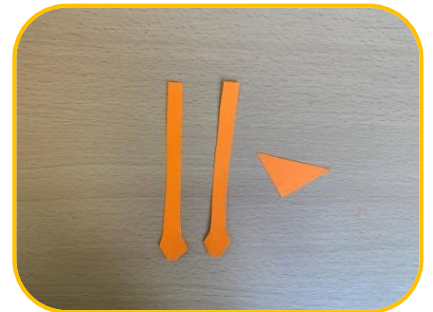

2. Use the paint brush to spread orange paint on your hands.

3. Press your hands firmly on the white paper to make handprints. Let them dry.

Variation: Instead of making handprints, use a pencil to outline your hands on the orange card paper and cut them out.

4. Cut out a beak and legs out of the orange paper.

5. Once the handprints have dried, carefully cut them out.

6. Assemble and glue your handprints, legs, beak and eyes on the paper plate to form a chicken.
