

Good morning Peach!

Date: 30.04.20

How is everybody doing? I hope that you have been enjoying the activities that we prepared for you.

Do you remember when we played fire officers on Monday? That was a great fun, wasn't it? Today, we will look again at people who help us. We will match different people with the tools and equipment they need for their work. Do you know the name of the tool that doctors use to listen to our breathing? It starts with the 's' sound. It is a stethoscope! Fantastic!

We will also use playdough to talk about different sizes such as big, small and medium and then we will create models out of reusable items. Yesterday, we spoke about recycling and how important it is for our planet. Visit our video channel and listen to a story about a little mouse that helped to save a big whale stuck in the rubbish in the ocean.

Finally, we will do a fingerprint investigation. I can tell you about fingerprints that every person has their special and one of a kind fingerprints. That is how unique we all are!

I wish you happy learning and as always, please continue to send in photos of all your amazing work.

Love,
From Eva
