

Good morning Peach!

Date: 21st April 2020

How is everybody doing? Are you ready to learn and do some exciting activities? Did I hear a loud *yes*? Fantastic! Today, we will learn about plants, flowers and growing. First, we will practise our cutting skills and create flowers. Make sure that you hold the scissors with your thumb up, just like we have learnt at nursery.

Then, we will use a very unusual painting tool to create a blossom tree. The tool is a green vegetable, very healthy and starts with a 'b' sound. Can you guess what it is?

We have also prepared for you a science experiment – planting, growing and observing cress. Think of what plants need to grow and take a good care of your cress. As you observe it grow, take photos so you can compare how it gets bigger every day.

I hope you will have fun doing the activities and learn some new great things.

Eva
