

Wednesday 29 April

Dear Willow Class,

Good Morning! It's time to...Explore, Learn and Have FUN! 😊

Today we have a marvellous topic for you – **RECYCLING!** **Recycling** means taking something you were going to throw in the trash, such as a piece of paper, and turning it into something new and useful like a new book. **Recycling** materials means less trash and saves space in dumps and landfills. When we use materials again, this means we can take fewer resources from the Earth.

We have activities for you to learn and enjoy recycling such as making own toys, looking around your house for recycling items, stories and videos.

Please visit regularly our Rising 3's website for more stories and activities on recycling and other interesting topics.

Finally, don't forget to send in pictures of all your amazing work. Thank you very much!

Today's snack idea for parents:

As your children eat their lunch, talk about the cups, plates or bowls that are full and empty, the materials they've been made of, can they be recycled etc.

I wish you a great day, full of fun, love, health and happiness!

Mr. Andonov
