2.45 pm		Snack time
3 pm	Communication and Language	Rescue the Frozen Vegetables!
3.30 pm		PE session – see Coach Mickey's video in our online learning section
Toddler Science	<p>This week's experiment is: Sensory Exploration with Feet</p> <p>Set out some medium-sized tubs with a different texture inside each one (rice, sand, soap, shaving foam, syrup, flour, water, etc.). Ask your child what they think each sensory tub will feel like. Encourage your child to step into the tub and feel with their feet, being careful not to slip. Describe the texture together – was it what your child expected? Try mixing some of the textures together – what has changed? Does it feel different now? Remember to have a tub of soapy water and a towel nearby to clean off!</p>	

<p>This week's Makaton sign:</p>		<p>Watch this video to see some more Makaton signs for food (skip to 1.52 for 'potato').</p> <p>Makaton is a simple sign language for children to be used alongside spoken words. We think all babies and toddlers can benefit from trying it out as they develop their speech and language skills. For more information, please read this CBeebies article</p>
<p>Story of the week:</p>	<p>Supertato by Sue Hendra</p> <p>Vegetable Glue by Susan Chandler with Sophie</p>	
<p>Tea (see suggested recipe)</p>
