

Thursday 14th May

Dear Elm Class,

Hope you are all well and ready to learn!

Today we will be revisiting recycling. Do you remember what recycling is? Recycling is reusing something that is old to make something new.

Did you also know?

- 55% of our rubbish at home could be recycled
- Plastics can take up to 500 years to decompose?
- Glass is 100% recyclable and can be recycled repeatedly?

Our story of the day is also about recycling and is called I can Save the Earth by Alisson Inches!

Other activities for today are:

- Threading Pasta- Using pasta to make a rainbow.
- Treasure Hunt- Finding hidden objects in shaving foam.
- Junk Modelling- Using recyclable materials to make a robot.

Have fun today and remember to never give up and to always try your best😊.

Wishing you a great day ahead,

Miss Dixon
