

Good morning Peach!

Date: 14th May 2020

I hope you are all doing great! Did you enjoy doing science experiments yesterday? Which one was your favourite?

Today, we will read a story *I Can Save the Earth* and think of ideas how we can keep our planet clean and green for everybody. What do you think? What could we do to protect the Earth from getting dirty with rubbish?

We will then exercise with our little fingers and use pasta and threading to create a rainbow. Who loves rainbows? Everybody! We will also get a bit messy when looking for small objects in shaving foam and after that, we will do junk modelling and make a robot or something else that you like. Just use your imagination and creativity and you can create anything!

Remember to revisit our extra activities such as number, letter and language of the week and also our video channel where you can find more stories and interesting things to learn about.

Enjoy playing, learning and creating! I miss you dearly and hope to see you back at Clowns very soon!

Love,
From Eva
