### Masking Tape Bridge

- You may wish to model the beginning of the activity.
- Help your child to create the bridge using masking tape. If necessary cut the tape in half to make thinner strips.
- Pay attention to the shape of the bridge.

### Painting

- Dab your finger into paint and start to create the painting.
- Demonstrate how to overlap your fingerprints to blend in the colours.
- Encourage your child to continue painting in this way.
- Use the wet wipe to clean your finger if necessary between paint colours.
- Don't forget to paint under the bridge also.
- Don't worry if paint gets on your masking tape. It will be removed once your painting is dry.

### Peeling

- When you have finished your painting allow it to dry completely.
- Once dry help your child carefully and slowly peel back the masking tape.
